Beard of Trade has never done anything to improve our municipal government. This is a sorry acknowledgement to make in view of our provincial city charter, our obsolete district school system, our extravagant method of maintaining the outside poor, the lack of electric wiring ordinances and building lines. It is true that many of these questions have been discussed at our meetings. Isn't it about time for deeds rather than words?

But now to the question: "What has this board done for Norwich."

What the Board Has Done. In the remaining time extended to me by your courtesy I shall endeavor to reply to the hackneyed question: "What has the Board of Trade done for Norwich?" Nothing is so detrimental to public

The American Excess

The Principal Cause of the Great Prevalence of Indigestion and Dyspepsia

A Trial Package of Stuart's Dyspensia Tablets Sent Free.

Man inhabits every part of the globs where external influences can be suc-cessfully resisted. Food is an impor-ant element in effecting this, and nature has provided for it accordingly. The colder the climate the more animal food and olly substances are required; the warmer a preponderanc of vegetables and fruits is necessar; in one's diet.

The whale-blubber of the fur-clad Eskimo, and the rice of the nude African, are as much necessities of local y as matters of choice. The same the diet in America and England is essentially different from that in Italy

Spain and Egypt.

The effects of universal commun cation are nowhere more obvious than on the luxurious table. To furnish the refined cuisine, all climates, both sea and land, are laid under contribu-tion, and the stomach is expected to digest, without assistance everything that is put into it. Combining to-gether such varied products, and the neglect of the relation between clim-ate and foods, are very active causes of dyspepsia.
The heavy substantial dishes of this

climate accord badly with the ther-mometer at ninety degrees; and an inflexibility in regulating the kind and quantity of food is a cause of a large proportion of the ill health and stemach troubles among the English and Americans.

Thousands of people who have suf-fered from stomach troubles, and a general Ill-health resulting therefrom. the ingesting of an excessive ame of food at the table, have obtained speedy and permanent relief by means of a simple expedient—that of using one or two of STUART'S DYSPEP-SIA TABLETS after each meal, or whenever any of the well-known SIA TABLETS after each meal, or whenever any of the well-known symptoms of indigestion are present.

These powerful digestive tablets contain every element that exists in the stomach to digest the food, and in the exact proportion as found therein. They take the place of the natural digestive juices when the latter are deficient in quality or quantity, and do their work for them, removing the indigestion by digesting the food and resting, strengthening and purifying the digestive tract.

There is no other digestive remedy on the market which has been found.
